

PANEL SPECIFICATIONS

PRODUCT NAME AND DESCRIPTION

Standard R Panel for roofing and walls.
Reverse R and Standard A Panel for walls.

MANUFACTURER

CBC Steel Buildings
1700 E. Louise Avenue
Lathrop, CA 95330
Phone: 209-983-0910

WARRANTY

Twenty-year material, and thirty five-year paint finish warranties are available.

MAINTENANCE

Only normal routine maintenance is required over the life of the panels.

TECHNICAL DATA

The Standard R Panel has received a Class 90 Wind Uplift rating by Underwriters Laboratories when tested in accordance with test procedure UL 580.

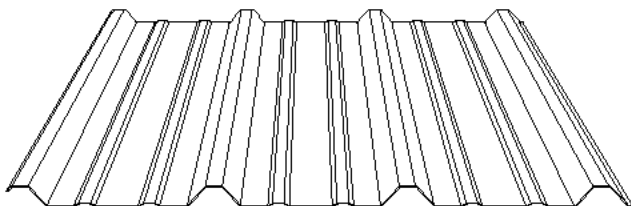

Materials: Standard R, Reverse R, and Standard A panels are produced from 26 or 24 gage 80,000 psi steel. Exterior finish is either AZ50 aluminum-zinc alloy coated, pre-painted G90 zinc-coated (galvanized), or pre-painted AZ50 aluminum-zinc alloy-coated. Pre-painted panels have CBC's Kynar 500 or Hylar 5000 finishes, available in 17 colors.

Fasteners: All fasteners for panel to secondary framing and panel to panel will be one of the following assembled bond seal washer hex head screws, color matched to the panel:

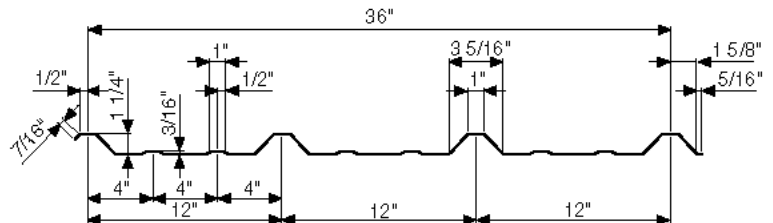

A. Roof and Wall fasteners used to fasten panel to secondary framing shall be #12 x 1-1/4" self-drilling carbon steel, zinc plated screws.

B. Roof and Wall fasteners used for laps and trim shall be #14 x 7/8" self-drilling carbon steel, zinc plated stitch/lap screws.

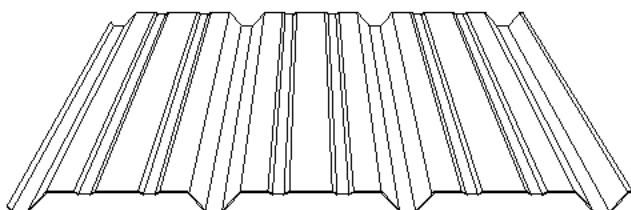

CBC Steel Buildings reserves the right to revise all standard specifications and information.
