WINDOW PROGRAM

Transform and enhance your building
with our window offerings.

THERMAL WINDOWS

CBC offers the first thermal aluminum window designed specifically for the metal building industry. The thermal window features a thermal-break frame and insulated glass to provide the energy efficiencies needed for extreme temperature conditions. This thermal window is self-framing and self-flashing to simplify the installation process.

Premium Pre-Assembled Thermal Features Include:

- Thermally Broken Aluminum Frame
- Double Paned Insulated Glass
- Universal Fin for Easy Trimming
- Self-Flashing and Self-Framing
- Many Glass Options (Tinted, Low E, Tempered, etc)
- Available in White, Bronze, or Black
- Available in Fixed, Horizontal Slide, and Project-In

Sizes:
2' x 6'
4' x 4'
5' x 4'

FIXED GLASS

Sizes:
3' x 3'
4' x 3'
4' x 4'
6' x 3'

HORIZONTAL SLIDE

Sizes:
3' x 4'

PROJECT-IN

NON-THERMAL WINDOWS

The Economy Frameless No-Thermal Break window provides a simple and reliable solution for projects that demand functionality without added complexity. Built with durable aluminum frames and designed to integrate cleanly with multiple panel types, this window option offers a streamlined appearance and dependable performance. With warm-edge insulating glass and a mill-finish frame, it delivers essential energy-supporting benefits while maintaining a straightforward, builder-friendly design.

Economy Frameless No-Thermal Break Features Include:

Available for: R-Panel, Reverse R-Panel, A-Panel, Masonry, and Steel or Wood Stud

- Aluminum Frames
- Self Framing, Self Flashing for R-Panel, Reverse R-Panel, and A-Panel
- Insulating Glass Using Warm Edge Technology
- Mill Finish
- Available in White, Bronze, and Black Finishes
- Available in Horizontal Slide

Sizes:
3' x 3'
4' x 3'
4' x 4'
6' x 3'

HORIZONTAL SLIDE

INSULVIEW WINDOWS

The Insulview Frameless Thermal Break window offers a high-performance solution for projects that require both efficiency and clean, modern aesthetics. Built with thermal-break aluminum frames and a self-framing, self-flashing design tailored for insulated foam panels, this window line delivers dependable energy performance without sacrificing visual appeal. The Insulview window provides the flexibility and capability needed to meet demanding design and environmental requirements.

Insulview Frameless Thermal Break Features Include:

- Thermal-Break Aluminum Frames
- Self-Framing/Flashing Design for Insulated Foam Panels for 2", 2.5", 3" and 4"
- Insulated Glass-Clear and Tinted
- Stock Sizes for Immediate Shipment
- Custom Sizes, Finish and Glass Available
- Available in White, Bronze, and Black
- Available in Horizontal Slide

Sizes:
3' x 3'
4'-0" x 4'-6"
6' x 3'

DESIGNED FOR **STYLE.**

ENGINEERED FOR **STRENGTH.**

WHY CHOOSE CBC FOR YOUR WINDOWS?

Engineered For Performance

Our window systems are designed specifically for the metal building industry, delivering trusted thermal efficiency and reliable performance. From thermal-break frames to insulated glass options, every component is engineered to help buildings operate smarter and more efficiently.

Seamless Integration

Our windows install cleanly and consistently across a wide range of panel types and building designs. Self-framing and self-flashing options remove complexity from the field, reducing labor time while ensuring a precise and professional fit.

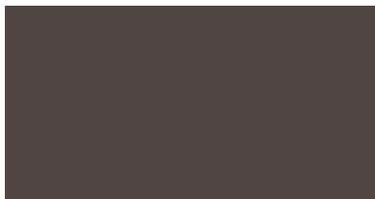

Match Your Vision

With an expanded palette of colors including white, bronze, and black, our windows offer more aesthetic flexibility. Choose from multiple styles, sizes, and glass options to create the look you want without sacrificing quality or performance.
