

Grand Cru Custom Crush

LOCATION

Windsor, CA

SIZE

31,000 sf

WALL SYSTEM

Insulated Metal Panels

ROOF SYSTEM

Standing Seam II

BUILDING END-USE

Wine Production/Sales

Grand Cru Custom Crush is a Co-Op wine production business producing 25,000 cases of wine per year. The operation is a step ahead of other crush facilities by utilizing a variety of small tanks, innovative crush equipment, and uniquely sized barrel rooms that target production. The design inspiration comes from a historical building overlooking the ocean in Cayucos, CA.

The building dimensions are 144' x 204' x 19'. Mechanical components of the building are attached to the side of the main facility and occupy a 25' x 63' area. The 19' eave height helps accommodate 66 wine tanks that hold 85,000 gallons and 2,240 barrels. Insulated roof and wall panels help meet Title 24 requirements.
