5" Insulated Metal Panels

## ROOF SYSTEM

SS-24

Grand Cru Custom Crush is a Co-Op wine production business producing 25,000 cases of wine per year. The operation is a major step ahead of other crush facilities and includes a large variety of small tanks, innovative crush equipment and uniquely sized barrel rooms that for target production.

The facility was designed using inspiration from a historical building overlooking the ocean in Cayucos California. This inspiration was carried forward to symbolize the artisan craft within their wines.

The Grand Cru facility is a 143' wide pre-engineered CBC multi span building with a 1 1/2 in 12 pitched roof. The building has a total length of 203'8" with the last 28' being a roof only covered crush area. The mechanical components of the building are attached to the side of the main facility and occupy a 25' by 63' area. The 19' eave height helps to accommodate 66 wine tanks that hold 85,000 gallons and 2,240 barrels. Title 24 requirements were met utilizing insulated panels in the roof and walls.

Buildign Dimension: 144'x 204'x 19'
