R-Panel

This 9,000 square foot steel building is a LEED certified research facility located in San Juan Bautista, CA. This was the first building in San Benito County to have a LEED Certification. This facility will house operations that consist of a laboratory and greenhouse buildings where researchers test seeds for resistance to pest and identify which will yield a higher producing product.

The main structure consists of a 103' 4" wide x 101' 4" long x 12' eave height steel building with a 1:12 roof slope. The roof and back building are sheeted with our standard R-panel in. The front portion of the building is sheeted with 2" HE40 Heavy Embossed insulated metal panels.
