The Lafayette Community Center is a modern, energy efficient 5,300 square foot multi-purpose space used for summer camps, sports activities, fundraisers and private events. The building is designed using a custom CBC building at 100' x 53' x 12'-9 15/16". The structure was designed to be simple yet allow daylight to flood the interior naturally. In addition to the daylighting design, it features a butterfly roof to give the interior a more open feel.
