## Maintenance Shop and Tractor Barn in Progress

Currently in construction with Authorized Builder Huff Metal Buildings, Inc., these new facilities will be the maintenance shop and tractor barn for the California Golf Club, in San Francisco. The project totals 21,749 square feet of pre-engineered clear span metal buildings.

The two-story maintenance building includes storage for tractors and equipment, as well as a fertilizer room and machine shop on the first floor. The second floor includes offices, an employee break room, and dormitory rooms. The tractor barn is a one-story building that includes a fuel and wash station.
