This massive 185,000 square-foot manufacturing plant is located in Northern Las Vegas. It is an expansion to the current production plant. It is made up of seven (7) buildings that are used for more than research and development. It will also serve as a production facility for spacecraft, a factory to build habitats to use on the moon, or Mars, or beyond. This steel building will house three spacecraft, three production lines and an assembly plant. It also features a custom curved mezzanine.
