

Pacific Woodtech Cold Press Building

LOCATION
Burlington, WA

SIZE
40,000 sf

WALL SYSTEM
R-Panel
Polar White

ROOF SYSTEM
R-Panel
Polar White

BUILDING END-USE
Manufacturing

Pacific Woodtech, located half-way between Seattle and Vancouver has been manufacturing engineered wood products since 1988. Pacific Woodtech manufactures engineered wood beams including Parallel-Strand-Lumber (PSLs) and Laminated Veneer Lumber (LVLs) used in beams, headers, columns, and posts.

This gabled symmetrical project includes extensive manufacturing space, a pre-heating (conditioning) section for wood/glue adhesion, and supporting office space. The building is enveloped with R-panel wall and roof systems.
