

San Antonio Winery

Riboli Family Winemaking & Event Center

LOCATION

Paso Robles, CA

SIZE

90,100 sf

WALL SYSTEM

Insulated Metal Panel

ROOF SYSTEM

Standard R Panel

The Riboli Family Winemaking & Event Center, designed with a modern atmosphere and old world charm, includes three separate rooms that can transform into one large room, holding up to 250 people. The event center can accommodate weddings, retirement parties, meetings and other celebrations or events. The building features stucco exterior, polished stained concrete floors, skylights constructed from redwood tanks, glass doors to the barrel room.

The production facility features 53,525 sf of indoor and 25,250 sf of outdoor winery operations. The use of CBC's pre-engineered metal building system allows for clear spans, low maintenance, and efficient insulation assemblies to optimize wine production. Phased expansion and flexibility of spaces were major design considerations. All systems have been prepared for modular expansion. The winery is entirely powered by Solar Panels and it recycles 100 percent of all water used. Open framing was used to allow for equipment, trucks, and the removal and installation of wine tanks to the facility. CBC's Insulated Metal Panels were used for the wall system and CBC's Standard R Panels were used for the roof system.
