

Santa Maria Tire

LOCATION

Santa Maria, CA

SIZE

9,985 sf

ROOF SYSTEM

SS-24 Standing Seam
Polar White

BUILDING END-USE

Truck Tire Retail and Service

Founded in 1946, Santa Maria Tire has been in the transportation solution business for the last 75 years throughout the coastal region of California. With multiple locations, SM Tire facilities feature mobile tire repairs, 24 hours a day. For the Santa Maria location, they chose a custom pre-engineered CBC Steel Buildings structure.

The retail and service center was built utilizing two single slope metal buildings — the warehouse and office spaces. It features parapet walls, which CBC supplied the parapet framings and back panels. There are below eave canopies and awnings, where the one run of tube support at canopy level and one run above the canopy to support the diagonal bracings were furnished by CBC. Also provided by CBC was a false rafter to support the lower roof purlins of the office building.
