BUILDING END-USE

Office and Warehouse Space

Located in Missoula, MT, Victory Equity Construction Inc. (VECI) specializes in providing underground utility contracting for projects of all sizes. VECI selected a 12,150 square foot gable symmetrical metal building for their new office and warehouse space.

The exterior features R-panel roof and wall panels, with 2' eave extensions. The building incorporates an 8' open lean-to that runs 65' from the left end wall, hipping around to the front side wall, running an additional 42' for an extra aesthetic touch.

Multiple windows strategically placed on upper and lower portions of the building allow for ample work lighting from end to end. With 6 overhead doors throughout, easy access is provided for the large fleet of Snowcats VECI provides to customers for winter access in remote locations across the state.
