BUILDING END-USE

Office & Warehouse

This 19,600 sf office and warehouse was designed for Kern Glass & Aluminum Company, the leading glass supplier in Kern County, specializing in commercial and residential glasswork. The structure features a stunning winged glass storefront that extends beyond the steel line at the top of the parapet elevation, adding dimension and superior visibility into the business.

A 3,300 sf mezzanine is attached to the glass entry, providing additional office space. Windows line the height of the mezzanine, which contribute more natural lighting and savings in energy costs.
