## LOCATION

Pasco, WA

## SIZE

8,190 sf

## WALL SYSTEM

R-Panel

## BUILDING END-USE

Commercial Auctions/Hangar

Musser Brothers is an auction company featuring professionally conducted auctions and liquidations. This custom steel building functions as their commercial staging space for automobile and airplane auctions and as an airplane hangar when needed. The structure was built at the edge of the airport, allowing for the 72' x 18' hangar door to open up directly to the runway.

The 90' x 91' building showcases an arched roof with an approximately 93 degree radius roof line and features a 3' 8" high masonry wainscot. The radius rafters and roof were part of the unique features and challenges of the build.
