## BUILDING END-USE

Retail Store & Warehouse

The Ashland Goodwill in Ashland, OR is a community-focused 14,464 sf retail facility designed to elevate both customer appeal and support smooth behind-the-scenes operations. Its two asymmetrical gable structures create distinct zones for retail, warehouse, office, and loading functions, all wrapped in Warm White R-Panels with Surrey Beige accents for a clean, modern look. Thoughtful features including below-eave canopies, multiple loading docks, and a dedicated covered donation drop-off were included in the design, and a Reverse R-Panel eave extension on the donation canopy adds both protection and a refined finishing touch.
